

Full Face Mask (F6S)

Introducing the F6S Full Face Mask, designed for great comfort and reliability. With an innovative over-the-head tubing connection, this mask ensures a secure seal while allowing you to sleep in various position, all night long. In clinical comparisons, users have reported higher satisfaction with this mask's ability to prevent leaks and provide a restful sleep experience.

The F6S Full Face Mask is engineered to support various sleeping positions, ensuring a reliable seal throughout the night, preventing leakage. Its unique under-the-nose cushion design allows for easy reading in bed—even with glasses on—while minimizing pressure on the nose bridge to reduce discomfort and marks, leaving you feeling refreshed the next morning.

360-Degree Tubing Freedom

The over-the-head tubing connection allows for unrestricted movement, ensuring a good night's sleep.

Quick-Release Elbow

Easily disconnect the mask during the night without removing it.

Soft Tube Frame

Air flows gently into the cushion through the elbow for enhanced comfort.

Open Frame Design

Provides an unobstructed view for reading, watching videos, or wearing glasses.

Lightweight Silicone Cushion

Designed with minimal pressure on the nose bridge for added comfort.

Safe Design

No magnetic buckles, reducing potential risks.
